

## **Department: Geography**

### **Programme Outcomes**

Participants in the program finish a curriculum that exposes and develops them in a wide range of fundamental knowledge and skills. They'll get the chance to master the following goals.

1. To understand the fundamental concepts in Geography.
2. Consider the skill development offered by the geographic studies degree as a component of professional paths in a variety of professions, including education, research, and administration.
3. Demonstrate your comprehension of maps and topographic sheets in order to examine the different elements of the area.
4. Develop the capacity to critically assess the larger network of spatial characteristics at different temporal scales, ranging from the global to the small.
5. Displaying a thorough and organized understanding of geography to address contemporary problems and their solutions.
6. Demonstrate your proficiency with the use of GIS, IRNSS, remote sensing, spatial statistics, cartography, and GIS science among other geographical research tools.

## PsO-

- 1) To understand the fundamental concepts in Geotectonics and Geomorphology.
- 2) To apply different computer software in academic purposes.
- 3) To know about field survey method and techniques.
- 4) To develop ability and skills in data computation, storing, formatting, analysis and cartographic presentation
- 5) To understand the fundamental concepts of Population and Settlement Geography.
- 6) To develop expertise in quantitative and qualitative analysis of field-based data and information

## Course Outcome

Department	Geography		
Class	Undergraduate Programmes in Geography (2023-2024)		
Course Code	Course Title	Credits	Course Outcomes
GEOG-M-T-1	GEOTECTONICS AND GEOMORPHOLOGY	6	· understand fundamental knowledge in Geotectonics and Geomorphology
			· obtain adequate knowledge on the internal structure, tectonic and structural evolution of earth, concept of Isostasy and earth's movements
			· acquire comprehensive knowledge of continental drift, sea floor spreading and plate tectonics theories
			· understand the dynamic nature of the earth surface processes, landforms and their evolution
GEOG-MI-T-1	PHYSICAL GEOGRAPHY	4	· understand fundamental knowledge in Physical Geography
			· obtain knowledge on the earth's interior, theories of continental drift and plate tectonics
			· understand fundamental knowledge of the earth surface processes, landforms and their evolution
			· acquire basic knowledge of atmosphere
GEOG-MU-T-1	DISASTER MANAGEMENT	3	· learn the basic concepts in disaster management.
