# **DOMKAL GIRLS' COLLEGE**

#### **Report on Thalassemia Screening cum Blood test Camp**

#### Date: 13.03.2024

## SUB-COMMITTEE/ CELL/ CLUB: NSS Unit and Health Subcommittee of Domkal Girls' College in collaboration with Murshidabad Medical College and Hospital

#### Introduction

NSS Unit and Health Subcommittee of Domkal Girls' College in collaboration with Murshidabad Medical College and Hospital organized a Thalassemia Check-up Camp on 13.03.2024 with the aim of creating awareness about thalassemia and offering free check-ups to students and staff. Thalassemia is a genetic blood disorder that affects the production of hemoglobin, leading to anemia and other complications if not managed properly.

#### NOTICE

It is hereby notified that a health awareness camp & Thalassemia Testing programme will be held on 13/03/2024 at 12:00 noon in collaboration with NSS and Health Sub Committee of Domkal Girls' College.

All students and staff are requested to be present in this programme positively.

(Dr. Alak Kumar Das) Dr. Alar Human Principal Domkal Girls' College PRINCIPAL Girls' College Domkal Girls' College Domkal, Murshidabad

# Objectives

- > To educate students and staff about thalassemia, its causes, and preventive measures.
- > To provide free screening tests for thalassemia to detect any potential cases.
- To offer counseling and guidance to individuals diagnosed with thalassemia and their families.

### Activities

The camp commenced at 12.30 PM and continued until 3:00 PM. The following activities were conducted:

- Registration: Participants were registered upon arrival to keep track of the number of attendees and facilitate smooth conduct of the camp.
- Educational Sessions: Informational sessions were conducted by healthcare professionals to raise awareness about thalassemia, its types, symptoms, and management.
- Screening Tests: Free blood tests were offered to all participants to check for thalassemia traits or other related blood disorders.
- Distribution of Informational Material: Pamphlets and brochures containing essential information about thalassemia were distributed among participants to serve as a reference.

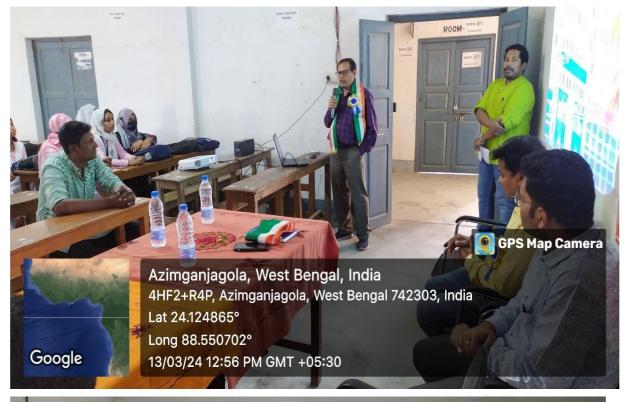

# Participation

The camp witnessed enthusiastic participation from both students and staff of Domkal Girls' College. Several volunteers, including medical professionals and students from the healthcare field, contributed to the smooth execution of the event.

# Outcome

- ➤ A total of 40 individuals availed themselves of the free screening tests.
- Participants expressed appreciation for the informative sessions and the opportunity to undergo free check-ups.
- The event succeeded in raising awareness about thalassemia and emphasized the importance of early detection and management.

#### Conclusion

The Thalassemia Check-up Camp at Domkal Girls' College was a significant step towards promoting health awareness and addressing thalassemia-related concerns in the community. By offering free screenings and educational sessions, the camp contributed to early detection and management of thalassemia, potentially improving the quality of life for affected individuals. Such initiatives underscore the college's commitment to the well-being of its students and staff and reflect its broader social responsibility towards the community.
