

Water Conservation Policy

Domkal Girls' College acknowledges the vital importance of water conservation in preserving this precious resource for future generations. We strive to implement effective water conservation measures across campus.

Objectives:

1. To promote water conservation practices among students, faculty, staff, and the local community.
2. To reduce water consumption and minimize wastage through efficient water management strategies.
3. To educate stakeholders about the importance of water conservation and the need to preserve freshwater resources.
4. To raise awareness about the impact of water scarcity and encourage responsible water usage.
5. To implement water-efficient technologies and practices to reduce water usage across campus facilities.
6. To optimize water management systems for maximum efficiency and sustainability.

Initiatives:

1. Install water-efficient fixtures such as low-flow faucets, showerheads, and toilets to minimize water usage in restrooms and other facilities.
2. Implement rainwater harvesting systems to capture and utilize rainwater for irrigation and other non-potable purposes.
3. Implement ground water recharging system to ensure water conservation and protect ground water resource.
4. Conduct regular inspections and maintenance to detect and repair leaks in plumbing systems and water storage tanks promptly.
5. Implement a proactive approach to address leaks and prevent water wastage.
6. Organize awareness campaigns, workshops, and seminars on water conservation for students, faculty, staff, and the local community.
7. Promote water-saving tips, such as fixing leaks, using water-efficient appliances, and avoiding unnecessary water wastage.
8. Conduct regular evaluations to measure water savings, identify areas for improvement, and adjust strategies accordingly.
9. Engage stakeholders in water conservation initiatives and encourage active participation in water-saving practices.
